

How to Remove an Expired iPhone Provisioning Profile

This document explains how to remove an expired iPhone provisioning profile. The intended audience are iPhone beta testers.

To remove the provisioning profile:

1. Open the Finder.
2. From the Finder menu select: **Go → Go To Folder...**
3. Enter in **~/Library/MobileDevice/Provisioning Profiles**.

4. Click **Go**.
5. From the Finder menu select: **View → as List**.
6. Use the **Date Modified** information in the list view to find the old/expired provisioning file.
7. Delete the file by moving it to the Trash.
